

Annual Scientific Meeting

7th - 9th October 2009

SHEFFIELD UNITED FOOTBALL CLUB, BRAMALL LANE, SHEFFIELD

IT IS A PLEASURE to invite you to Sheffield to join the annual scientific meeting of the UK Chapter of the ILAE. The meeting is to be held in Sheffield United's Bramall Lane Football Stadium on Wednesday 7th to Friday 9th October, with Dr Markus Reuber as the local organizer. We have an attractive and varied programme, including sessions on memory and epilepsy, frontal lobe epilepsy, syncope in adults and children, basic science platform presentations, a primary care session and neurosurgery case discussions. We also have two Lifetime Achievement Award presentations, a lively debate on the use of EEG, and potentially excellent industry symposia.

A new departure for 2009 is the case presentation competition and we now invite you to submit abstracts of cases that might be of interest to epilepsy clinicians with the intention of presenting them in the prize session. We are running expert-led poster sessions and so would also welcome your clinical and scientific abstracts for poster presentation with an opportunity to discuss your poster with an expert-led audience.

Please contact Conference2k (www.conference2k.com) for registration details. You can submit your abstracts on line through our re-energised website – www.ilae-uk.org.uk

UK ILAE Chapter meetings are widely renowned as great social as well as scientific occasions, with opportunities to meet, network and socialise with like-minded epilepsy colleagues from around the country. Do join us in Sheffield to help to make this meeting one of the very best from every aspect.

Phil Smith

President of the UK Chapter of ILAE
